

Price List – Genetic testing

Preimplantation genetic screening (PGS) by Next Generation Sequencing (NGS)

Flash PGS – 24 hour turnaround

Up to six embryos	£2,400
Per additional embryo	£250

Traditional – 2 week turnaround

Up to six embryos	£1,500
Per additional embryo	£200
Embryo banking, biopsy only, no analysis (per cycle)	£500

Preimplantation genetic diagnosis (PGD)

PGD – single gene by Karyomapping

1 st cycle or subsequent cycle with re-optimisation	£5,200
Subsequent cycle without re-optimisation	£2,500

PGD – two genes (or one with HLA matching) by Karyomapping

1 st cycle or subsequent cycle with re-optimisation	£6,400
Subsequent cycle without re-optimisation	£2,800
Fee to apply to HFEA (if required)	£800

Couples considering PGD will require full genetic reports of the condition being tested for and genetic counselling.

The above services can only be performed in conjunction with the appropriate fertility treatment to create embryos and subsequently transfer them.

Biopsy: most biopsies will be performed on D5 or D6 (blastocyst stage) and so will incur a fee for blastocyst culture.

Payment terms: all the above charges are payable upon presentation.

Cancellation: PGS pre-biopsy £100, post biopsy £500 (biopsy fee, no test); PGD: test dependent
